Introducing

A NEW CONCEPT IN CONTAINER GROWING

HEXI SPACE SAVER

Advantages of HEXI SPACE SAVER POTS

1. Set more pots per square foot.
2. Eliminate air space between containers to stop weeds from growing.
3. Root systems stay warmer in cold weather.
4. Water and fertilizers will not miss pots, so you can use less.
5. Chemicals that normally miss round pots tend to contaminate the runoff in nearby streams. This is eliminated.
6. HEXI SPACE SAVER POTS have six (6) stacking lugs and six (6) corners that are reinforced for a stronger container. When set side by side you can almost walk over them without collapsing them.

Available in 6 ins. with 6 drain holes.
Available in 8 ins. with 6 drain holes or mesh bottom.
Other size nursery containers available: 4 to 16-in. diameter.
